

profitability. think**modern.**

We take pride in our performance—for you. When you replace an inefficient reverb furnace with a Modern Jet Melter®, you'll reduce your melt losses by up to 80%. That's a bankable profit on raw materials. You'll increase your energy efficiency by 50% or more while producing a higher quality end product. **Dramatically Improved Profits.**

That's the way to **thinkmodern.**

"We're very pleased with it. The bottom line is that it was well worth the investment."

"We actually had two furnaces doing the work this one (Modern) furnace is now doing. We're extremely happy with that."
